Ideal Resort and Picnic Grounds

(Farmington Times,) When John T. Burks was in Farmington last week he gave a Times reporter a brief outline of the work he expects soon to have done at Iron Mountain lake, just as soon as he can find time to give it the necessary attention. He recently leased for a period of years the entire Iron Mountain tract of land, which includes the great lake, which has long been a popular resort for picnicing, fishing and pleasure seeking. During the past year or two that property has been somewhat neglected, and especially has the lake been permitted to deteriorate from lack of necessary to deteriorate from lack of necessary attention.

Mr. Burks Intends to shut off the lake from the public domain with a fence, and to charge 25 cents for each automobile that enters, and he expects to have guards to prevent cars from being molested when the owner may not be present. This alone will be an accommodation to pienicers and pleasurer seekers. But he does party best, as the Lodges will find out says the Christian Science Monitor, if not intend to stop there. It is his present intention to make that division, we are all Americans, and ter written to the editor of a St. beautiful place a real resort by addthe American ideal of a world peace Johns paper, is equally delighted to ing many conveniences for the benehave that country chosen as the start- fit of all who seek a day, a week or a month's outing there.

He proposes to put in a number of boats for rent to all who may desire them. Already he has reclaimed and newly equipped the large electric launch for the benefit of pleasure seekers. He will also probably keep live minnows constantly on hand live minnows constantly on hand there for the benefit of those who may desire to fish, and it is altogether probable that he will install a natatorium. He also expects to have a store, or stand on the grounds, where everything necessary in the way of refreshments from ice cream cones to a loaf of bread, can be secured. Ice is another essential he will try always to have on hand for the benefit of all who may desire to keep thoroughly

When that splendid resort is again put up in "ship shape" then will its present popularity be much enhanced. Where hundreds of auto loads of people now Sunday there, thousands of auto loads will then be found there on Sunday, and many will seek that weels. Sizes of American Flags.

The garrison flag of the United States army is made of bunting, with 36 feet fly and 20 feet hoist; 13 stripes, and in the upper quarter next the staff is the field or "union" of stars, equal to the number of states, on blue field, ever one-third length of flag, extending to the lower edge of the fourth red stripe from the top.

Need Energy-Yielding Foods.

Persons who are doing heavy physical labor and very active children need more energy-yielding foods than physical labor. Some of the principal energy-vielding foods are cereals. bread and butter, corn breads, white and sweet potatoes, cream, and other wholesome fats, and sweets.

Manchurian Footgear.

In order to withstand the extreme cold of winter in eastern Manchuria the natives wear a moccasin of cowhide sufficiently large to permit the feet to be swathed in long strips of cloth and then to have a soft, dry grass packed around them. The shoe apnears clumsy, but is warm, soft and almost water tight.

Topping Potatoes.

Attempts at removing the green tops of potatoes on the assumption you a lady?" that they detract from the tuber development have proved it a poor plan, and in the majority of cases where records were kept, the topped potatoes produced the poorest tuber crop weight, though in some instances the potatoes were larger.
